

Introduction to principles of digital project management

Dr. Ian Hussey

Digitalisation of Psychology

Make projects & decisions understandable for other people*

*including your future self

{find-the-data exercise}

Knit early, Knit often

The minimal test of whether your code works is to knit your R Markdown file.

If it doesn't work for you, it won't work for others.

Separate code and data

```
GitHub repo for project
method
    — qualtrics implementation
    — self-report scales
      ___ self-report scales.docx
 code
      analysis.Rmd
      processing.Rmd
      models
      L__ model_fit.rds
      plots
        - figure_1.pdf
          figure_2.pdf
 data
      raw
         - data_raw.csv
         data_raw_codebook.xlsx
      processed
        – data_processed.csv
         data_processed_codebook.xlsx
      results
        — results_summary_statistics.csv
         results_regression_table.csv
  communication
      preprint
      L— hussey et al. – 2024 – title.docx
     presentations
      L— hussey et al. - 2024 - conference presentation.pptx
 README.md
 LICENSE
```

Separate raw data from processed data

Alter the raw data only as much as you are legally and ethically obliged to

Eg deanonymise it

Other than this, these files should only be read.

```
GitHub repo for project
 method
      qualtrics implementation
     self-report scales
      L— self-report scales.docx
 code
      analysis.Rmd
      processing.Rmd
      models
       -- model_fit.rds
      plots
         figure_1.pdf
          figure 2.pdf
  data
         data_raw.csv
         data_raw_codebook.xlsx
      processed
         data_processed.csv
          data_processed_codebook.xlsx
      results
        — results_summary_statistics.csv
          results_regression_table.csv
      preprint
      — hussey et al. – 2024 – title.docx
     presentations
      L— hussey et al. - 2024 - conference presentation.pptx
 README.md
 LICENSE
```

Include a data dictionary for each data file

You can create these manually or use various R packages.

They can greatly vary in their complexity.

But they should at minimum explain what variables represent.

```
GitHub repo for project
 method
      qualtrics implementation
    - self-report scales
      ___ self-report scales.docx
 code
      analysis.Rmd
      processing.Rmd
      models
       -- model_fit.rds
      plots
          figure_1.pdf
          figure 2.pdf
  data
         data_raw.csv
          data_raw_codebook.xlsx
      processed
          data_processed.csv
          data_processed_codebook.xlsx
      results
        — results_summary_statistics.csv
          results_regression_table.csv
      preprint
      L— hussey et al. - 2024 - title.docx
      presentations
      L— hussey et al. - 2024 - conference presentation.pptx
 README.md
  LICENSE
```

Separate processing code vs analysis code

Do not do analyses in processing or processing in analyses

Eg create exclusion variables in processing, but apply exclusions in the analysis

```
GitHub repo for project
 method
      qualtrics implementation
    _ self-report scales
      self-report scales.docx
 code
      analysis.Rmd
      processing.Rmd
      models
       — model_fit.rds
      plots
         figure_1.pdf
         figure 2.pdf
  data
         data_raw.csv
         data_raw_codebook.xlsx
      processed
         data_processed.csv
         data_processed_codebook.xlsx
      results
        results_summary_statistics.csv
         results_regression_table.csv
      preprint
      — hussey et al. – 2024 – title.docx
     presentations
      L— hussey et al. - 2024 - conference presentation.pptx
 README.md
 LICENSE
```

Link your specific analyses to your manuscript

In analysis.Rmd, link each analysis, table, or plot to how it is used in the manuscript.

Eg

'Figure 1 in manuscript'

'Hypothesis 1 in manuscript'

```
GitHub repo for project
 method
      qualtrics implementation
     self-report scales
      --- self-report scales.docx
  code
      analysis.Rmd
      processing.Rmd
      models
       — model_fit.rds
      plots
          figure_1.pdf
          figure 2.pdf
  data
      raw
         data_raw.csv
          data_raw_codebook.xlsx
      processed
         data_processed.csv
          data_processed_codebook.xlsx
      results
        results_summary_statistics.csv
          results_regression_table.csv
      preprint
      — hussey et al. – 2024 – title.docx
      presentations
      L— hussey et al. - 2024 - conference presentation.pptx
 README.md
  LICENSE
```

Include a README.md or README.txt

.md is just a text only markdown file, can't run code. Can be opened in RStudio or dedicated editors like Typora.

Include specific instructions on how to reproduce your results!

What files to run, in what order, and where to find the output.

```
GitHub repo for project
 method
     qualtrics implementation
     self-report scales
         - self-report scales.docx
  code
      analysis.Rmd
      processing.Rmd
      models
       — model_fit.rds
      plots
          figure_1.pdf
          figure 2.pdf
  data
         data_raw.csv
          data_raw_codebook.xlsx
      processed
         data_processed.csv
          data_processed_codebook.xlsx
      results
         results_summary_statistics.csv
          results_regression_table.csv
      preprint
      — hussey et al. – 2024 – title.docx
      presentations
      L— hussey et al. - 2024 - conference presentation.pptx
 README.md
  LICENSE
```

Include a license!

Don't make people guess if they can reuse your data or code

Don't leave your project in legal limbo

'CC-By 4.0' or 'MIT license' are both probably fine.

Licensing is a mess - but no license is a way bigger mess.

```
GitHub repo for project
 method
     qualtrics implementation
    _ self-report scales
      L— self-report scales.docx
 code
      analysis.Rmd
      processing.Rmd
      models
       ___ model_fit.rds
      plots
         figure_1.pdf
          figure 2.pdf
 data
         data_raw.csv
         data_raw_codebook.xlsx
      processed
         data_processed.csv
          data_processed_codebook.xlsx
      results
       — results_summary_statistics.csv
          results_regression_table.csv
      preprint
      — hussey et al. – 2024 – title.docx
     presentations
      L— hussey et al. - 2024 - conference presentation.pptx
 README.md
  LICENSE
```
